PROTECTING THE
BEST BRANDS

Most successful brands today are plagued world over by forgery, falsification, counterfeiting, tampering, or product diversion. This leads to substantial financial losses for the brand owners and severely depletes the brand equity of the legal manufacturer. The time has come for brand owners to adopt a comprehensive anti-counterfeit programme through a multi-layered strategy.

Shriram Veritech Solutions Pvt. Ltd. (SVSPL), a part of the USD 3.0 billion Shriram Group, is one of the first and foremost industrial houses. Veritech has imbibed the same spirit of enterprise, ethics, research, innovation, and good practices as its parent group and endeavors to live up to them.

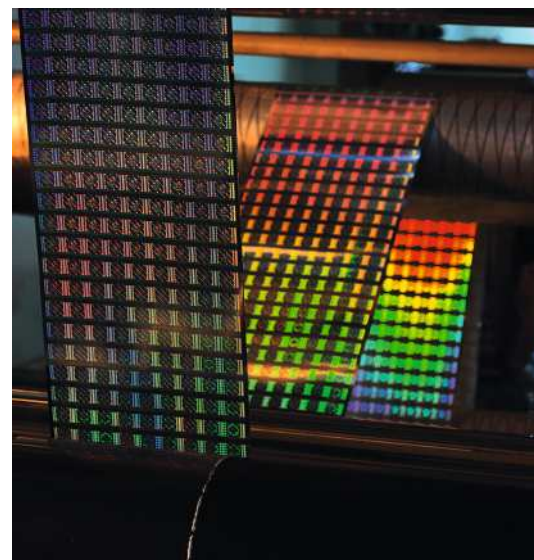

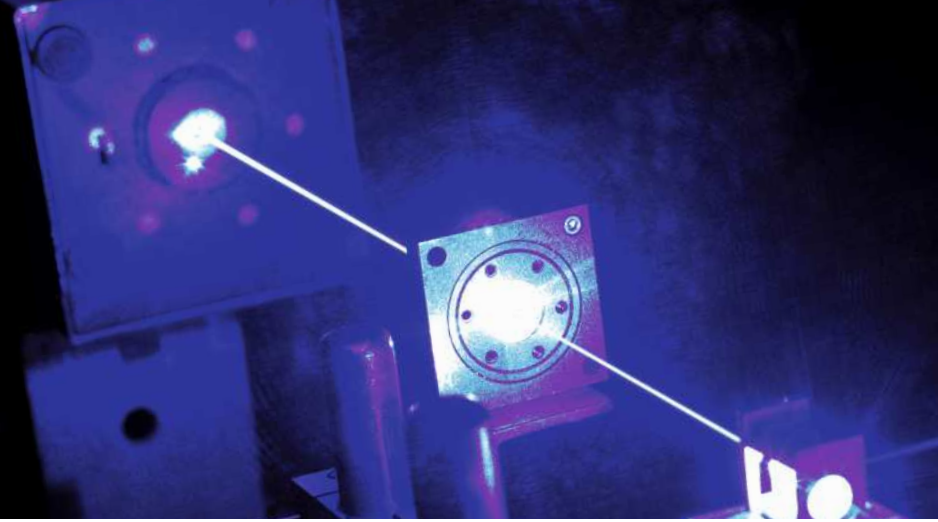

Veritech is one of India's most extensive Brand Protection and Anti-Counterfeiting Solution Providers, with over 1200 satisfied customers in more than 50 countries across the world

At Veritech, we offer customized solutions to meet the needs of its customers through a wide range of products such as Labels; Holograms; Shrink Sleeves; Stamping Foils; Packaging Films; Induction Seals; Lamination Films, Barcode Solutions & many more.

Leaders in Brand Protection, Document Security & Packaging Solutions

In addition, continuous emphasis is laid on R & D to ensure that Veritech's security solutions protect the brands from any risk of imitation, forgery or tampering.

Equipped with prestigious global certifications, including the Hologram Safety and Security Management System (HSSMS), Veritech innovates state-of-the-art, customized solutions in its high-tech manufacturing facility at Greater Noida, India.

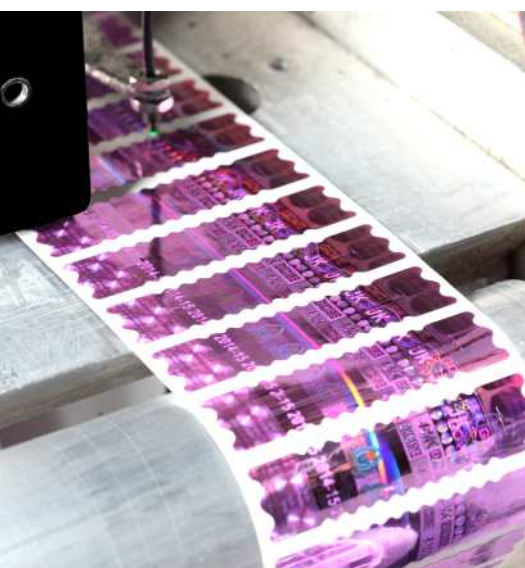

Shriram Veritech is already the largest and most relied upon company for brand security solutions. We aim to make Veritech a 'Power Brand' by building a dynamic and loyal customer base, offering value additions in every experience. Furthermore, we envision expanding into new segments with innovative products, thus building a brand sentiment with our customers.

Veritech is the full founder member of the Authentication Solution Providers Association or ASPA, that governs the Indian hologram industry.

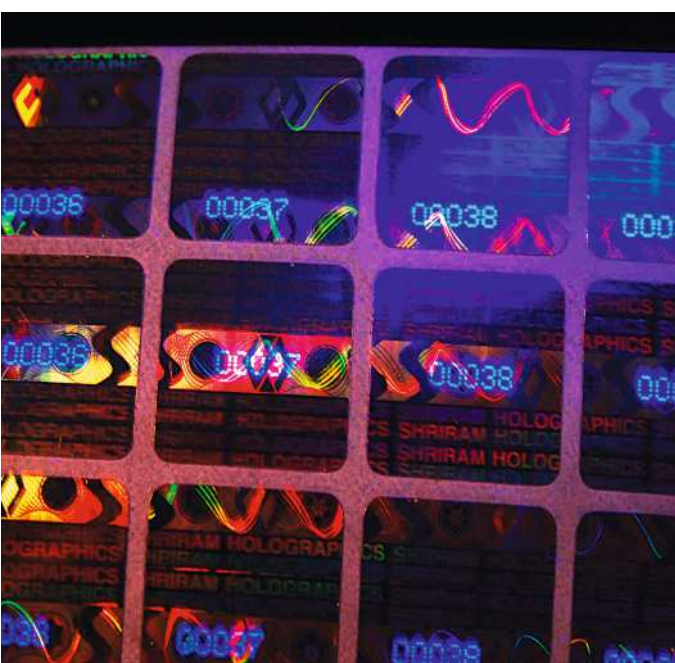

The international hologram industry is largely governed by IHMA. All the leading hologram manufacturers across the globe are members of this association.

Leading with
World Class
Technology

An epitome of professionalism,
trust and reliability

With the toughest certifications for Hologram manufacturers in India, Veritech ensures that it provides its customers with products that are manufactured in a safe & secure environment.

HSSMS - the Hologram Safety And Security Management System is the only certification that ensures the safety and security of the licensing brand's integrity at the hologram manufacturer's production facility.

End-to-End Customized Solutions

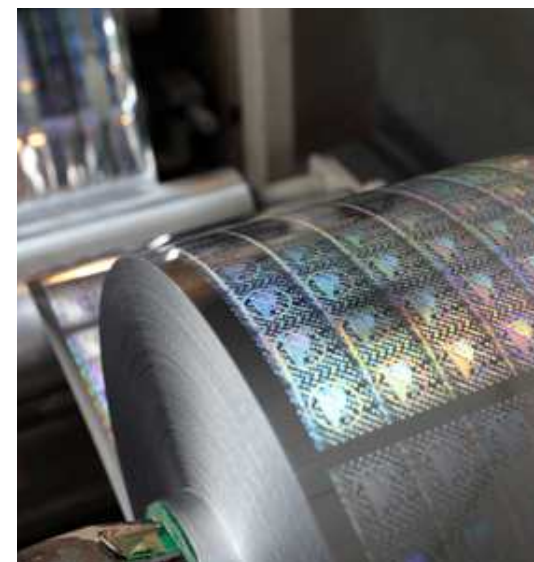

Veritech has an unparalleled reputation of being technically advanced, thus reiterating the mandate to protect the best brands. By continuously investing in Research & Development, we have created a steady pipeline of new products to meet customers' demand requirements. A sound technical understanding of customer's needs enables us to provide the optimum solutions at all times to our esteemed customers.

We believe in going the extra mile. In line with this philosophy, our team has developed a host of value-added features. This technological up-gradation & customization helps our customers to stay ahead of counterfeiters at all times.

Leading with World Class Technology

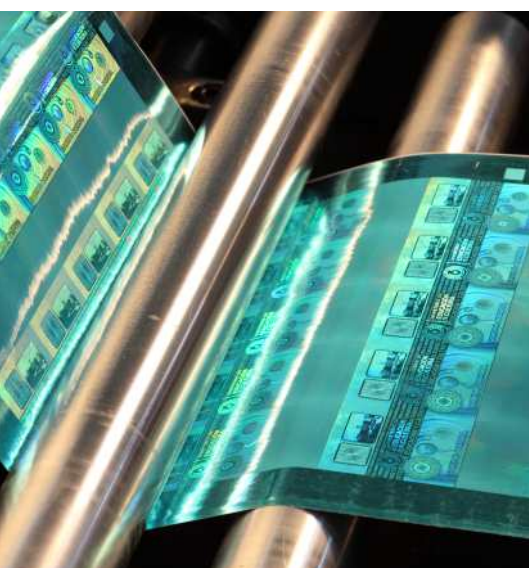

Veritech specializes in identifying the specific needs of its customers and offers customized solutions for its brand protection, document security, packaging, and supply chain monitoring. Each solution comes with its strengths and is devised to suit varied industry sectors and budgets.

Our unwavering commitment to innovation ensures that our products are designed to complement each solution. From concept to execution, we help you to implement adequate brand protection & enhancement programs using some of the best technologies and systems available in the world today.

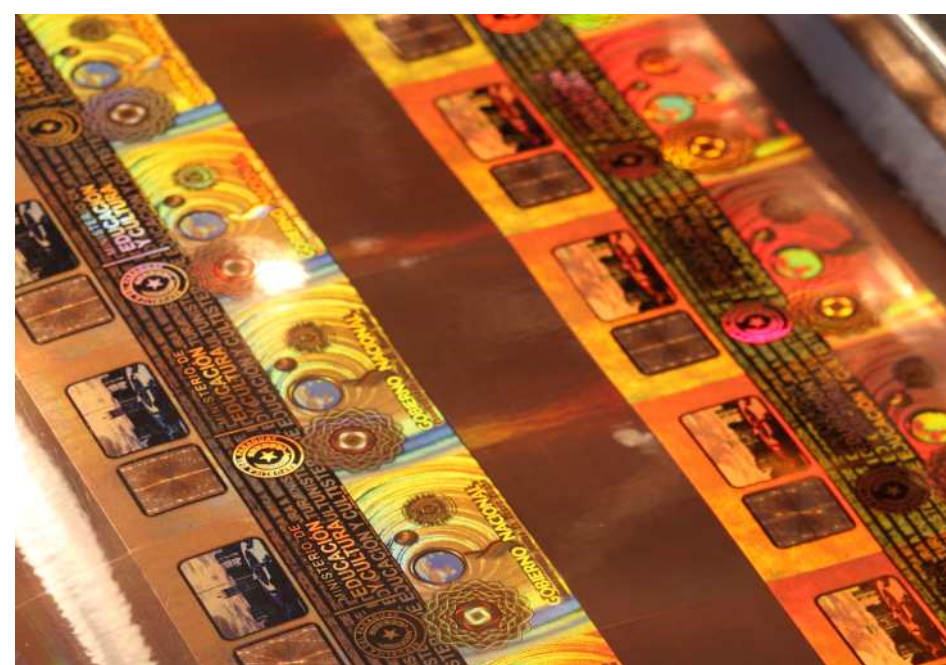

Supplying top-quality products to our customers requires excellent engineering and design and outstanding manufacturing quality. Veritech's state-of-the-art, fully integrated production facility enables Veritech to produce the best products. In addition, its production and quality systems are among the best in the world, which helps Veritech to achieve a high degree of customer satisfaction.

Flawless production is the focus of our activities and is backed by our highly skilled experts who put their to work and take pride in the superior quality of our products. Modern production machinery and systems, most of the computer-controlled or aided, are at their disposal, ensuring the high level of accuracy, repeatable and error-free production results that our customers have come to expect.

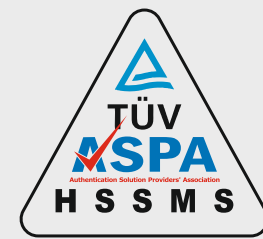

State-of-the-art Plant, Systems and Infrastructure

State-of-the-art machinery & process control systems

Productivity is an obvious benefit of automation. However, reliability is the real gem that sparkles as the cornerstone of any efficient manufacturing process. Veritech's fully automated print inspection system scans for errors. It verifies variable information such as bar codes, serial numbers, or QR codes printed on labels or holograms, thereby ensuring that defect-free products are supplied to the customer every time.

We offer the three 'S' Security, Speed and Service and have built a reputation of unwavering trust and credibility through the highest standards of professional integrity. Widely known for our reliability and sound principles; we offer the unbeatable combination of advanced technology & highest quality to our customers. Our mantra is Customer Satisfaction through 'continuous improvement' in all spheres.

With years of business experience and a testimony of hundreds of satisfied customers, Veritech has indeed come a long way.

Turnkey Solutions: Integrating Physical & Digital Security

At Veritech, we manufacture world-class holograms with a host of **overt, covert and forensic security features**, making them virtually impossible to be duplicated by anyone. These physical products are then further secured with an added layer of digital security in the form of unique identification codes. These codes make your products completely traceable throughout your supply chain, as well as enable your end-customers to authenticate the products at the point of sale, using only their mobile phones.

Veritech specializes in identifying the specific needs of its customers and offers customized solutions for it brand protection, document security, packaging and supply chain monitoring. Each solution comes with its own set of strengths, and is devised to suit varied industry sectors and budgets.

Our unwavering commitment to innovation ensures that our products are designed to complement each solution. From concept to execution, we help you to implement effective brand protection & enhancement programs using some of the best technologies and systems available in the world today.

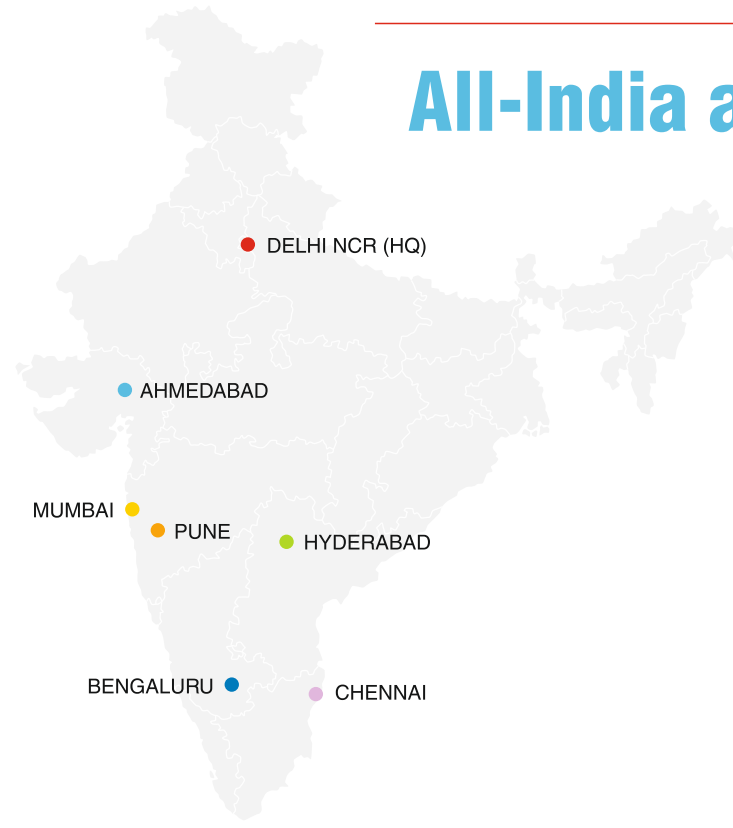

Veritech has more than three decades of experience in the brand protection industry. It is one of the few companies in the world which offers a full-service manufacturing process, providing end-to-end solutions for its customers including design, manufacturing, application support, data collection / reporting , after sales technical support and much more. Some of the advantages of our turnkey solution are:

- Unparalleled data security
- Single point of contact
- Greater control over quality
- Design & manufacture in sync
- Huge reduction in costs

Global presence across more than 50 countries.

All-India after-sales support

At Veritech, we believe that after sales support is as important as sales itself. While it does not generate any revenue for the company, it immensely increases the goodwill of our organization in the market and amongst our customers.

After sales support is very important for us, to not only build a long term connect with our customers, but also to regularly introduce them to new products, features and evolving technologies in the realm of brand protection solutions. This helps our customers to continuously upgrade themselves and always be better equipped to fight against counterfeiting.
